## EDUCATION

---

### Universidade Federal do Ceará

Bachelor in Physics

2017 - 2022

## EXPERIENCE

---

### Unifor

*Software Developer - Python*

2021 - 2022

### UFC

*Undergraduate researcher*

2019 - 2020

## SKILLS

---

Programming Languages: Python, JavaScript, SQL  
Frameworks: React, Django  
Languages: English, Portuguese  
Tools: Git, GitHub, Shell, NodeJS

## PERSONAL PROJECTS

---

### Weather-app

<https://ianclima.github.io/weather-app/>

I developed a weather website that utilizes the OpenWeatherMap API to provide users with current weather conditions and forecasts for any location in the world. The project involved integrating with the OpenWeatherMap API, which required me to obtain an API key and learn how to make HTTP requests to retrieve weather data in JSON format. To create the website, I used HTML, CSS, and JavaScript to design a user-friendly interface that allows users to search for weather information by city.

### Library

<https://ianclima.github.io/library/>

I developed a website that allows users to store a list of books they plan to read in the future. The website utilizes object-oriented programming (OOP) principles and the CRUD (Create, Read, Update, Delete) operations, with JavaScript as the primary programming language.
